

FLOOR PLAN: RECOMMENDED EXHIBIT LAYOUT

Dimensions are Approximate
 July 16, 2015

- The Fur Trade in Minnesota exhibit is designed to be flexible. Each graphic panel is paired with one or more interactive components.
- The Retractable graphic panels are single sided and ideally the backs should be facing walls.
- Tabletop Interactives, except for media elements, can be positioned to be used from multiple sides.
- Maintain at least 36" clear space between components for wheelchair/ADA access. Ideally 48" clear space should be allowed.
- Exhibits can also be grouped by topics either in one room or spread throughout several. See the alternative floor plan on the next page for more information.

PLAN VIEW Room size approx 25' x 13'
